Dear Patient:

Thank you for choosing St. Luke's Cataract & Laser Institute for your cataract evaluation. We are honored by your confidence in our team and appreciate that you've entrusted us with your care.

We understand that for many people the thought of having cataract surgery can be daunting. At the same time, we believe cataract surgery today offers truly exciting opportunities to provide you with an outcome that is uniquely suited to your lifestyle and vision needs.

As part of your preoperative exam, we will explain the benefits of advanced cataract surgery, which combines bladeless laser cataract surgery with state-of-the-art, High Technology lenses. During this visit you will have a comprehensive exam, and your eyes will be dilated. We will perform extensive diagnostics and testing on your eyes. We also will take time to understand your lifestyle and vision goals so we can recommend the surgical and lens options best suited for you.

The decision to have cataract surgery is important, and we encourage you to bring someone to your consultation with whom you discuss health and financial decisions. We welcome your questions and the opportunity to address any issues and concerns you may have as we walk you through the surgical process. Following your preoperative exam and consultation, our team will schedule your surgical appointment.

At St. Luke's Cataract & Laser Institute, "*Life Changing Vision*" is our way of expressing our dedication to providing the highest quality of care, while embracing the needs of our patients. We look forward to serving you.

Sincerely,

Pit Gills, MD

Jeffrey Wipfli, MD

Brandon Rodriguez, MD
